Hi Evelyn,

Best wishes for your new roles in the Chesapeake Bay Program. The Program will get a lot of benefit having your experience.

We have been involved in the toxics (PCBs and PFAS) program and we are willing to share our learnings. Please do not hesitate contacting us.

I met Greg Voigt at the latest Water Quality Advisory Committee Meeting at DRBC.

Regards,

Namsoo

Thank you for the quick reply. We have now reorganized and I am working for the Chesapeake Bay Program. We are actually moving around the building next. Greg Voigt is the supervisor in charge of Standards, Monitoring, and TMDLs now.

Attached are PCB data collected from tributaries by DRBC and DNREC from 2002 to 2017.

Yes, DRBC collected tributary PCB samples in 2016 and 2017. I can provide more details later.

I am copying Bill Richardson, but I don't think that we have done any.

Subject: FW: DRBC head of tide tributary monitoring

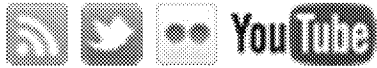

Hi All,

I misunderstood John's inquiry. Have we performed any head-of-tide PCB tributary monitoring in the last decade?

Please let me know.

Thanks,
John Y.

Hi John,

This is a follow-up to your conversation with Ron MacGillivray at the Chesapeake Bay Program STAC meeting. I believe you asked about our locations for tributary nutrient monitoring. Attached please find a brief description prepared by Elaine Panuccio. I look forward to working cooperatively with DNREC on this effort. Feel free to coordinate directly with Elaine (copied on this e-mail).

Thanks,
John Yagecic
